

In general citations for items in the OA collection are for the print version of an article or conference paper. The citations are formatted using a modified MLA formatting style. Always check to make sure the citation is in the modified MLA format when you are editing a record.

For the modified MLA format:

- When adding dates to a citation do not abbreviate months
- The DOI at the end of the citation is optional (if an item doesn't have page numbers or an article number, definitely add the DOI)
- If there are not page numbers use the article number instead in the citation
- Page numbers are not preceded by "pp." and article numbers are not preceded by "no."
- When available add the copyright statement to the end of the citation
- Terminal periods at the end of citations are optional

Below are examples of the most common citations used.

*When page numbers are available for an article:*
