## About the July 2017 Maintenance Release

The e-Builder monthly maintenance releases contain a list of resolved cases for the month.

### Your Opinion Matters

We rely on your feedback to better serve you. If you have ideas about improving our product or service, please don't hesitate to let us know. Below are four ways to reach us.

- **Like/Dislike**  – Located in the banner of e-Builder Enterprise™ are like and dislike buttons. Click these to express your opinion of a particular page. This feedback is used to help prioritize upcoming product enhancements.
- **e-Builder Product Ideas** – The Product Ideas portal gives you a platform to share your thoughts on how to make e-Builder better. You can read and vote on the ideas of fellow e-Builder users or post your own. Number of votes are taken into account when forming e-Builder's roadmap. To access the Product Ideas portal, click the arrow next to your username within the banner of e-Builder Enterprise, and then click Product Ideas.

- **Support** – Our Support staff is always available to meet your needs. To speak to a live customer service representative, call us within the U.S. at 888-288-5717 and outside of the U.S. at 800-580-9322, or email us at [support@e-builder.net](mailto:support@e-builder.net).
- **Annual Technology and User Conference** – The annual e-Builder Technology and User Conference offers a unique and up-close opportunity to gain insight into e-Builder product direction, learn best practices from industry professionals and peers, and to exchange information and ideas with members of the e-Builder community.

## What's included in this Document

- A list of resolved cases

## Release Note Change Log

The release note change log includes all changes made to this version of the Release Notes document.

Date	Version Number	Description
July 20, 2017	1.0	Initial Release

## Resolved Cases

The following is a list of resolved cases for the month of July. If you have any questions regarding this maintenance release, please contact e-Builder Support at 888-288-5717 or via email at [support@e-builder.net](mailto:support@e-builder.net).

## Bidder Portal

### Case Number: 00225508

BID RESPONSE EDIT DISAPPEARS

When the response to a bid question that was viewable to all bidders was edited, the question was no longer viewable to all bidders. Now the question and response are both visible again.

### Case Number: 00225465

BID DOCUMENTS NOT BEING UPDATED IN THE BIDDER PORTAL

When files were uploaded into a folder designated as the Bid Documents folder on a Bid Package, it was not available to bidders until the Bid Package was re-saved. Now the file becomes available when it is uploaded.

**Case Number: 00221434**

UNABLE TO REOPEN USER BID

Previously the bid contact was unable to accept the request due to an issue with the time zone because the time was too close to the due date time. Now the system work properly.

**Case Number: 00217170**

THE NEED HELP? LINK ON THE E-BUILDER BIDDING PORTAL LOGON PAGE FAILS TO RESOLVE A WORKING WEBPAGE

The "Need Help?" link was redirecting the user to an invalid Url. Now the link redirects to the correct support Url of e-Builder.

## Bidding

**Case Number: 00219360**

BID EXPORT NOT PROPERLY DISPLAYING THE BID COMMENTS

Previously, excel was not expanding the cell for the qualification notes. Now the system work properly.

## Contacts

**Case Number: 00220635**

CONTACT IMPORT IS FAILING WITH VALIDATION THAT FIRST NAME IS TOO LONG

Previously the system wasn't allowing import contact if the First Name was more than 50 characters. Now the system work properly allowing importing if the First Name is up to 128 characters, which is the same restriction when a new contact is being created in the system.

## Cost

**Case Number: 00225671**

FORECASTS EDITS NOT SAVING CHANGES

Several Forecast features weren't working due to errors on the format of the ID's used by the functions that handled the functionality. Now we remove those format errors and the functions behave as designed.

**Case Number: 00221883**

ADDING SCOPE ITEMS TO COMMITMENTS WITH 1000+ LINE ITEMS SHOWING OUT OF ORDER

This issue is that in the table of commitment change items is sort by comparing item number as string instead of integer. This made numbers like 1010 will be in the grid before 999. It has been fixed to read as an integer.

## Documents

### Case Number: 00219034

FILE TREE WON'T SCROLL ON IPAD

Previously, when logged into the application on an iPad using the Safari Browser, the scroll was not working in the file tree. This has been fixed an scrolling is available.

## Forms

### Case Number: 00191386

FORM TYPE PERMISSIONS REPORT INCLUDED CHANGE PERMISSIONS

Previously, when users changed the selected commitment after adding items to the change items grid, the grid would not refresh allowing users to create commitment changes with items from multiple commitments. Now, the grid will be cleared after each commitment is selected.

## Processes

### Case Number: 00220874

FILTER STILL NOT FUNCTIONAL IN SOME CASE

The issue is when the user searches for the Process column name in the Containing Text field without spaces. The process column name we structure with spaces. Now, we are comparing without spaces to make sure always matches, regardless what the user enters.

### Case Number: 00219709

PROCESS INSTANCE HAS AN EB ERROR UPON OPENING

The system was generating a null reference exception in some cases where the system is trying to get the file extension type from a file without extension in the file name. Now if the file has no extension the system just returns an empty string.

### Case Number: 00194457

MAIL MERGE RETURNS ERROR WHEN PRINTING UNPOPULATED PROCESS INSTANCE

When the system gets the custom field IDs, its trying to find values for these custom fields and merge the data. When there is no data for custom fields, the system is trying to convert the ID to a Date type. Now, if the "fieldValues" variable is empty, we will replace it with a null value.

**Case Number: 00218538**

IMPORTING PROCESSES IS NOT RECOGNIZING PROJECT IDENTIFIER

When the project identifier has a value that it is also a value of a custom field it was taking that value of the custom field as the identifier instead of the id of the project.

Now it takes the project identifier.

**Case Number: 00217879**

E-BUILDER ERROR WHEN TAKING ACTION ON PROCESS

Previously, when a processes instance is created against a voided commitment, it was unable to move forward because it was unable to be found in list of commitments (approved commitments). Now a check was added for the existing instances holding voided commitments to prevent them from submitting and added check to hide the void (In cost module, to prevent from voiding) button if any instance is using any commitment

**Case Number: 00217239**

ERROR: UNABLE TO LOAD WORKFLOW, AFTER STEP ACTOR CLICKS ON "SHOW WORKFLOW DIAGRAM"

If the cost integration type of a process is due to account level, then the system creates a Master Project to hold those processes, and how any user doesn't belong to that project will not have access to the instances of that project. Previously the system wasn't checking this case and throwing an exception when the user tries to open the workflow, now the system work properly.

**Case Number: 00216587**

RICH TEXT VALUES NOT HONORED IN MERGE

The issue was with the font type that was stored in an incorrect format. Now it is stored correctly.

## Projects

**Case Number: 00224482**

DETAILS PORTION HAS EXTRA CHARACTERS

Due to a previous issue if some custom fields of list type had comma on their value, then the comma was replaced by the "&". Now we clean up those values and reverted back to their correct value.

**Case Number: 00220531**

FIELD DEPENDENT DROP DOWN VALUE IS REPLACING A COMMA IN THE NAME WITH "&"

Due to a previous issue of some custom fields of list type having comma on their value, then the comma was replaced by the "&". Now we clean up those values and reverted back to their correct value.

**Case Number: 00216882**

ERROR MESSAGE WHEN DOING BULK EDIT

Previously the system was trying to map some global custom fields with no values causing an error because there are custom fields stored in the database with no values. Now the system works properly, mapping only custom fields that has values stored.

## Reports

**Case Number: 0192039**

SCHEDULE NOT UPDATING AFTER IMPORT

Previously the system wasn't updating the tasks in a schedule when a import action is taken. Now the system work properly.

**Case Number: 00212314**

SCHEDULE REPORT RUN TIMES ARE DIFFERENT

For the subscription reports, the next run time was showing incorrect because there was no Day Light Saving (DST) check constraint on below pages. The DST check constraint has been added and times are correct.

**Case Number: 00216170**

BI SAVE AND CLOSE DOES NOT TAKE YOU TO THE REPORT DESIGNER

When saving a new BI report, the system wasn't opening the design view automatically. Now it opens the design view.

**Case Number: 00218241**

IN A DASHBOARD REPORT THE Y AXIS SHOWS THE NUMBER TWICE

An example of this issue was the values that return the report for Y axis are 0,1,2 and the data that is used is integer. As the dashboard used is a bar chart, that bar has set as default that it is showing 5 values, so when it tries to show data on that axis as it just has 5 it repeats the values. Now when there are less than 5 values it shows the correct quantity of values.

**Case Number: 00218351**

REMOVED DOCUMENT IN A FORM IS STILL SHOWING UP IN A REPORT

The report should only report on actual attached files and exclude those that have been deleted or removed. This has been corrected.

## Schedules

**Case Number: 00219058**

UNABLE TO ADD TASKS TO EXISTING SCHEDULE

Previously the system was not allowing add task to the existing schedule. Now the system work properly.

## Time Tracking

**Case Number: 00206074**

DUPLICATE TIMESHEETS

Previously, when attempting to submit timesheets using the bulk submit functionality, if the user clicked the 'Yes' button on the confirm dialog multiple times, each timesheet would be submitted for every time the user clicked 'Yes'. Now, the buttons to submit/delete a timesheet from the bulk operation will be disabled until the request to the server is complete.
