

# Learning Architecture of the Projects Academy

Don Lessard

# Rebalancing – From PM to MPLs

# Projects Academy – Learning Architecture

# Design Principles

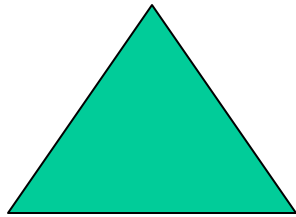

- Problem-based
- Integrative
- Action-oriented
- Faculty as problem-solving coaches and consultants rather than (just) talking heads/ringmasters
- Integrative learning, not necessity integrative teaching!

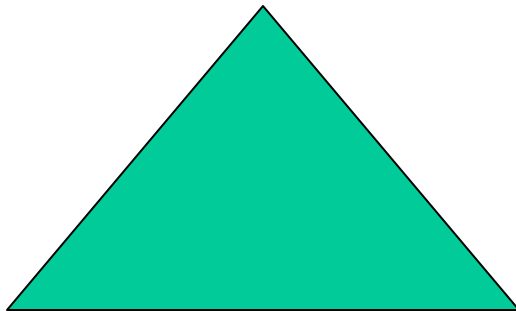

# Nested Learning Architecture

**.... Half-day session: Tools, examples, group application, mutual exploration/reflection**

**....Deep dive: 2 days prep, ½ day presentation over two weeks**

**... Interterm project: in term selection, sensemaking, reports/sharing, visioning/inventing/relating, final report**

# Inter-term Initiatives

- **Team-based Action Learning Projects** spanning all three terms
- **Self-selected Teams** (of 3-6) focused on real issues facing BP Projects
- **Projects reinforce concepts learned** at the Academy and apply them to real business issues
