#### All IS&T Queues Surveyed

#### Interpreting the Report

The scores and charts on the first two pages show cumulative averages over 12 weeks of client responses to our per-ticket survey questions. Each ticket belongs to a specific queue, and scores are reported at the queue level on page 3. The IS&T level rolls up all the surveys; Service Desk rolls up many CSS queues; Call Center is a subset of that and excludes the Repair Center, which is shown on its own. For all the charts, the 12-week window rolls forward each week, and the scores are always across that window.

The multiline charts try to convey the rhythm of service performance over time and the relative levels of satisfaction by service dimension. A high-performing service would have all its lines flowing consistently at or above 4.5 and not too far apart from each other. Some queues have survey responses too intermittent to graph with weekly readings; those are show using only summary numbers for each dimension. The numbers are 12-week averages.

Detailed results by month by queue are shown on the third page showing up to 3 months and resetting at the beginning of the quarter. Color-

# all-Os-surveys visb

These Queues have low enough response rates per week that a weekly graph would be misleading. All scores presented are a Quarterly average, to smooth out sparse data. Monthly detail appears in the table on the next page. Note: the big box score of "**Overall Satisfaction**" refers to question 7 on the survey, not an aggregate of the other scores listed below.

					Since the network outage lasted for a bit we change our network topology temporarily to provide internet access involving a bit of cabling. Unfortunately the staff sent us an email that the network issue has been resolved. Hence we undid all of the cabling and after a while the network went down again. We had to redo all the work again to provide internet access which was a bit frustrating. It would be useful in the future to completely diagnose the problem and solve it
-	1/25/2010	TNIS::Trouble Calls	1129857		before notifying the contact person that the problem is solved.
-		Help Desk::Call Center	1140093	5.00	Great, as usual. Nothing. The problem needs to be resolved by my financial
			1139851	5.00	officer.
					The individual who helped me was courteous, polite, and helpful. However, I called earlier in the day and IS&T was closed for a period of time (about 2 hours) in the early afternoon. I am not sure if this happens daily or whether it was a specific case, but it was frustrating to find that they were not
			1139111	4.17	actually open 9-5 as stated.
					I simply could not figure out what to do in order to get to the
					point that would allow me to do what I wanted (which was to start a website on my MIT webspace in order to practice
					Dreamweaver - I couldn't figure out how to get to the correct
					spot without maybe messing up my connection to my office's
			1138999		website).
-			1137747	5.00	It was an excellent experience!
			1137715	5.00	Staff member was very thorough and also very good-natured! I submitted this ticket for someone who contacted me
					regarding the recent phishing incident. The answer came promptly and I was able to use that for anyone else who
			1137401	5.00	contacted me with the same issue. It seemed like I got a form response, because it said (roughly), "This is spam, don't respond to it." Which I already knew because I had sent it in as a report on the spam that I was
			1137074	3.33	getting.
- E				0.00	i was just forwarding a spam email. there was no resolution
					really needed. but I was responded to in a timely professional
			1136952	5.00	manner. thanks!
			1136260	4.17	My problem was simply the lack of support of 64-bit windows
Ē					This small trouble, as it turned out, stemmed more from a
					peculiarity of my own MacBook Pro laptop than from any flaw of your system. But your staff person whom i happened to
					reach via your 253-xxxx help phone number proved to be well
					informed about that oddity too, and so we together sorted
L			1136256		things out quite quickly. Thanks again.
-			1136111		Building was a little hard to find.
-			1135950	4.17	Unfortunatly there was no solution to the issue
					I said "satisfied" rather than "very satisfied" because it did take five consultations over 90 minutes to accomplish the downloading to my new computer of Microsoft Word. However, that was better than (on my own) not being able to do it at all (in intermittent attempts over the previous two days). In a way, the fact that it took several IS&T people to solve the problem
					made me feel like I wasn't such a dope to be unable to do it

				This ticket actually covers two internet connection outages
				(the problem recurred after it was fixed). I was pretty
				dissatisfied with the handling of my ticket on the first occasion -
				- it took over 2 weeks for IST to fix the internet connection on
				my work computer, and it just broke again a few weeks later.
				Although I had no trouble contacting an IST rep about the
				issue, the people I spoke to told me that they didn't have the expertise to fix the problem. (But when my PI called up, they
				managed to find someone with expertise and fix the problem
				within 24 hours.) I was quite satisfied with the second handling

				Thank you for this follow-up. Your IST "Help Line"staff
				member could not have been more helpful and patient. For
				many years, I have used remote access software (TIMBUKTU) to control my office computer from home. I would like to do the
				same from my Lap-top when travelling or vacationing.
				Basically, I need to get onto the Internet with my lap-top, and I
				would like my lap-top to have independent capability to do so
				(i.e., be wireless). Your staff member and I discussed the
				availability of such capability through companies such as AT&T
				which I had investigated. While monthly charges for such
				service are quite reasonable, a contract of 12 to 24 months is
				also required, and I need it only until June 30. If such service
				can be obtained at a lower cost, either through MIT or
				otherwise, neither your staff member nor I know of it. If you
				would care to discuss this further, please contact me at jmdhosi@mit.edu, or x3-3301, or at home, 617-527-5916. (I will

				All that needed to happen was the router needed to be reset. I
				don't understand why this took 4 days, especially since it can

On Wednesday, filled with frustration, I called again and was very aggressive in my requests. I believe that request got a second ticket number and within a few minutes, I got an email that the routers were resetting. This solved the problem. I am extremely disappointed that clearly explaining that an entire class could not get consistent web access was not ! a red flag to a help desk person; nor was explaining that the class. Thank you for asking about my experience.

				He was great! He was extremely thoughtful, committed, and
		1115961	5.00	resourceful in helping with a complex issue. Much gratitude! The process of taking ownership of files in Windows 7 (in this
				case files that were created under XP) is complex sometimes
				works, sometimes doesn't. Sometimes when it works the
				permissions gained are lost on the next bootup. I am
				sympathetic with you guys, to whom Windows 7 is srill new. But there must be some straighforwad way to solve thie type of

		1115247	2.50	and for all.
				The IS&T department actually did not resolve my ticket
				problem. I use a Mac and when I have problems the team often cannot help me on the spot and need to call me back. When I
				called this time the woman asked me to make sure my
				resolution was at the highest, which it was. The zoom had been
				turned on (I didn't know Macs had a zoom function). But other
				than fixing the resolution she had no idea how to fix my problem. She took my information and said someone would get
				back to me. In the mean time I did a google search and found
				the solution myself. I called IS&T back to make sure they didn't
				spend time trying to fix my solved problem when they could be
				using helping someone else out. Overall I am dissatisfied by
				their general lack of knowledge on Macs. I realize they predominately use and fix PCs, but if you work at the Help Desk
				you need to know other machines than PCs. Many faculity,
				staff, and student use Macs today and the IS&T staff really
				needs to be as proficient on the ! Macs as PCs. I am thankful
