### FY2010 Q3 -- RT Ticket Feedback / Client Satisfaction Survey Results

#### Interpreting the Report

The scores and charts on the first two pages show cumulative averages over 12 weeks of client responses to our per-ticket survey questions. Each ticket belongs to a specific queue, and scores are reported at the queue level on page 3. The IS&T level rolls up all the surveys; Service Desk rolls up many CSS queues; Call Center is a subset of that and excludes the Repair Center, which is shown on its own. For all the charts, the 12-week window rolls forward each week, and the scores are always across that window.

The multiline charts try to convey the rhythm of service performance over time and the relative levels of satisfaction by service dimension. A high-performing service would have all its lines flowing consistently at or above 4.5 and not too far apart from each other. Some queues have survey responses too intermittent to graph with weekly readings; those are show using only summary numbers for each dimension. The numbers are 12-week averages.

Detailed results by month by queue are shown on the third page showing up to 3 months and resetting at the beginning of the quarter. Color-

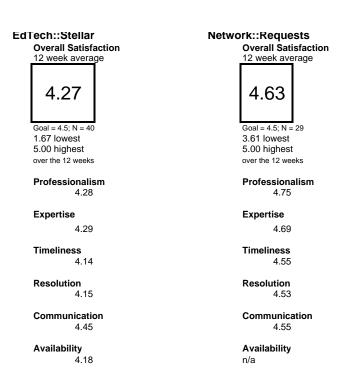

#### all-Os Surveys xisb FY2010 Q3 -- RT Ticket Feedback / Client Satisfaction Survey Results

These Queues have low enough response rates per week that a weekly graph would be misleading.

All scores presented are a Quarterly average, to smooth out sparse data. Monthly detail appears in the table on the next page.

Note: the big box score of "Overall Satisfaction" refers to question 7 on the survey, not an aggregate of the other scores listed below.

				I was told that you aren't certified to work on Toshiba laptops,
				and that the best help he could offer me was to either mail away
				to Microsoft for a CD or take my laptop to Microcenter and ask
				their Geek squad. I think this was abominable seeing as it was
				not an issue with the laptop itself, but more that Windows had
				crashed. IS&T was reluctant to provide me any service, and I
				think that this is ridiculous considering the caliber of
				technology at this university. Furthermore, I believe that this
				probably happens to many students across campus because
				not everyone owns a Dell or the few select laptops which you
		1166458	1.67	are actually certified to fix.
				Jacob was extremely helpful in researching the issue and
				finding the solution, quite professional and polite in the
		1165908	5.00	process.
				Telephone help was very good. My problem was not solvable,
				but I more or less expected that it would be a problem in the HP
				software, and nothing you could do about it. So I hoped for a
				happy resolution, but didn't expect it. Your guy was really
		1165749	5.00	great. THanks.
				I emailed your staff for assitance in finding a higher end PC for
				my professor as I don't have much time to do that. I was
				directed to the main shopping page with the one PC and one
				Apple to choose from. If we are expected to research such
				requests ourselves and purchase it outside of our MIT internal
		1164224	1 67	purchasing then I just needed to know that.
		1104224	1.07	purchasing them i just needed to know that.
				I thought the staff did a good job. Unfortunately, the problem I
				had with my computer was not something they could fix
		1163095	4.17	because Apple does not support products over 5 years old.
				pp
				with regards to my ticket, i would like to say that the staff gave
				me more credit than I deserve in their confidence in me
				following the procedure to authenticate windows 7. The section
				that was relevant to my problem was not very prominent on the
				page so I inadvertently looked over it the first time, it had to be
				explicitly pointed out. If this was done in the first place the
		1162145	4.17	problem would have been resolved much sooner. Thank you.
				I have not received any emails about a loaner laptop, so the
		1162111		issue is not resolved.
		1161362	0.83	No one acknowledged my ticket - just closed it.
				Fred was extremely helpful, courteous, and patient. As a
				graduate student, my availability to answer non-critical emails
				is limited so I appreciated Fred's persistence in trying to
				resolve my ticket, and the manner in which he approached it
		1142585		(he wasn't pushy at all).
	Help Desk::Service Center	1161825	4.17	My wireless network stopped working 3 days later.

				manner (my own availability was the bottleneck). The only 2
				comments I have are: 1. I had a key not working in my
				keyboard. They ran a 4-hour hardware test on my laptop
				(rendering me pretty much out o work during that time) only to
				agree that this indeed is the problem and that a new keyboard
				should be ordered. I'm not the pro, but I'm not 100% convinced
				the 4-hour test was a necessary step. I take their (your?) word
				for it. 2. When I brought my laptop in for the first time, it was in
				standby mode with several applications opened. No one
				explained to me they will have to turn it off during diagnostics.
				It was quite annoying to find out they shut it down. I would
				much rather be told that in advance so that I can gracefully
				close my applications, save files, etc. Perhaps it is assumed
				that people know that, but apparently, we don't all think about it
				in advance, even being MIT smart cookies. So I suggest adding
				this! step to the receptionist: ask (remind) people to gracefully
				shut their session down and turn off the machine before
2/22/2010	Help Desk::Service Center	1156700		leaving it for diagnosis/repair Again, other than those
		1154214	5.00	Excellent, prompt service, as always. Thank you! I ne job took longer than I expected and was incomplete. I
				asked specifically for data retrieval from one folder and was
				told that all of the data were retrieved from that folder but when
				I tried to transfer the data it was clear that only a small
				percentage of data from that folder was able to be recovered. I
				called a number of times to find out about the status of my job
				and met with varied types of responses. One man who I spoke
				with was very helpful and attentive but the others did not really

				And then blamed it on me not telling them what my problem
				was. And even after they gave me a "solution" the problem
				persisted. It's as if they only wanted my problem to be solved

				In answers to questions 1 and 5, I've put N/A because I had
				two very different experiences with the staff that solved this
				ticket for me, and the answers differ between them. Person one
				is who I got on the phone in the first place: I didn't feel she
				wasn't very courteous, and for me that got in the way of her
				professionalism. Likewise, I had some trouble understanding
				her explanations despite my computer expertise. Person
				number two, the one who has assigned to the ticket, and the
				one who solved it was the opposite: I didn't get a chance to talk
				to him on the phone, but just by the email exchange, I felt I was
				dealing with a professional, courteous and patient staff, and he
				explained everything concisely and in a very understandable
	TNIS::Trouble Calls	1142259	4.17	manner. Thanks!
				I Believe that IS&T did the job they could, but if you go to
				Google, (not MIT-Google), and type "csbi", the first thing that
				comes up is "CSBi at MIT", which is just where I wanted to go.
				It does not come up at all on MIT-Google. That is really bad! It is
				also true for the Broad Institute (even though it is now
	Help Desk::Call Center	1154516	2.50	independent, it still has MIT affiliations and should be there!!!)

	1141602	Actually, your staff did not resolve my problem. They could not figure out what the problem was. A friend figured it out.  Nothing was really resolved. The behavior with

				Thank you for the feedback opportunity. My laptop either
				stopped working (complete freeze) or would not start with the
				power button. The IST tech thinks it is due to the hard disk. It
				seems to more connected to the logic board (why would a disk

				The less that satisfied responses above refer to my one main
				concern. I'm a staff member at MIT who wrote in with a
				question regarding a student (who I cc'd (and noted this in the
				email) to involve him in the correspondence). However, the person who wrote back, while giving a helpful and accurate
				answer, failed to include the student in the reply. While it
				wasn't a big time sink for me to forward the response onto the
				student in question, it seems less than efficient and would have
				been better to include the student on the reply to a) give him
				the answer asap and b) minimize the # of emails. I'm not sure if
				this is because of a limitation in RT or staff procedure, but if
				you could look into it I think that would be helpful. There are
				lots of service providers on campus like me who, instead of just referring students to IS&T, like to go the extra mile to contact

Since a significance number of their comments had disappeared from our stellar course site, I was unable to carry out this task. Any useful solution would have needed to be very prompt. I am sure that the problem resolution team has to handle many urgent issues at the end of the term. The December break led to further delays in handling the problem. When the team did focus on the problem, I supplied as much information as I could, but they were unable to retrieve the lost comments or to figure out why they disappeared. I am disappointed since I depend upon the reliability of my stellar site as a means of storing key student documents. I realize that some problems just cannot be solved. I only hope that I do not encounter a similar loss of ma! terial this semester. I have tried to move away from making paper copies of all student work, but that strategy will only work if the stellar copies remain accessible.

				Always appreciated when, in the case that a person on your team can't answer a question, that person then finds someone
				else among the computing-help group who can answer it and
				solve it. You have a great pool of knowledge to draw from, and
				we are best served when, in a difficult case, your team takes
				advantage of your greater resources and communicates with one another to help solve a given problem and to teach us. No

				began an IAP class with more than 50 people. We could not get
				a stable internet connection. I have a lot of IT experience and
				called the help desk; when they didn't have a good suggestion
				and kept misunderstanding (believing that individual people
				had pc problems), I suggested to them that they reset the
				routers. Instead, they took the ticket, did nothing, and no
				person ever came, though I was promised an in-person visit. I
				called multiple times that day and was ultimately told that I
				should not expect the routers to be able to support the
				students. On Wednesday, filled with frustration, I called again
				and was very aggressive in my requests. I believe that request
				got a second ticket number and within a few minutes, I got an
				email that the routers were resetting. This solved the problem.
				I am extremely disappointed that clearly explaining that an
				entire class could not get consistent web access was not! a
				red flag to a help desk person; nor was explaining that the
				class was on web technology or that it was a one week class.

			Only problem was that I dropped in during walk-in hours (4:30
			PM) but no one was around to help. However they were able to
			help me first thing the next morning. Being able to have my
			problem fixed on the spot would have taken satisfaction from
