FY2010 Q3 -- RT Ticket Feedback / Client Satisfaction Survey Results

Interpreting the Report

The scores and charts on the first two pages show cumulative averages over 12 weeks of client responses to our per-ticket survey questions. Each ticket belongs to a specific queue, and scores are reported at the queue level on page 3. The IS&T level rolls up all the surveys; Service Desk rolls up many CSS queues; Call Center is a subset of that and excludes the Repair Center, which is shown on its own. For all the charts, the 12-week window rolls forward each week, and the scores are always across that window.

The multiline charts try to convey the rhythm of service performance over time and the relative levels of satisfaction by service dimension. A high-performing service would have all its lines flowing consistently at or above 4.5 and not too far apart from each other.

Some queues have survey responses too intermittent to graph with weekly readings; those are show using only summary numbers for each dimension. The numbers are 12-week averages.

Detailed results by month by queue are shown on the third page showing up to 3 months and resetting at the beginning of the quarter. Color-

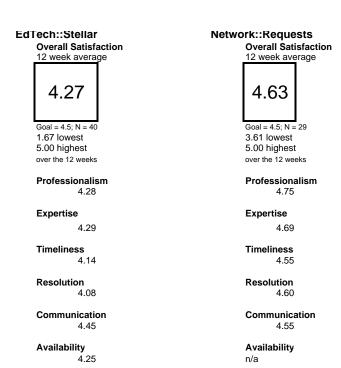

all-Os Surveys xisb FY2010 Q3 -- RT Ticket Feedback / Client Satisfaction Survey Results

These Queues have low enough response rates per week that a weekly graph would be misleading.

All scores presented are a Quarterly average, to smooth out sparse data. Monthly detail appears in the table on the next page.

Note: the big box score of "Overall Satisfaction" refers to question 7 on the survey, not an aggregate of the other scores listed below.

		1173232	5.00	Rob was most professional, patient& helpful with a somewhat untechnical individual. Many thanks to him

		1170840	2.50	took routing the problem to many people before it was solved. Getting appropriate authorizations to a temporary worker may be a very rare problem - I'm a retiree working through Nextsource - in which case, this issue doesn't merit your time. If, however, it comes up often, it might be something to work out with HR, perhaps giving Nextsource employees some kind of quasi-MIT appointment so that the various MIT systems can find them.
		1170125	4.17	I tried phone support but gave up after I was on hold long enough to find a temporary workaround. Email support worked fine, and got me an answer overnight.
		1163219	0.83	said they didn't know and didn't plan on making the situation work anytime soon that was about it wish our school could use a security method that is at least compatible with the most common & popular browsers
		1152466	5.00	when I could not get a certificate online. It ended up that I didn't need to come in person or bring my laptop, I just needed to use Firefox instead of Explorer. Very nice and professional people in the office. A man who helped me went above and beyond for me, really appreciate it.
	Help Desk::Service Center	1168401		Good service thanks, I would have preferred having the DVD issue diagnoses at the first time, instead of havig to bring the laptop back again
		1168373		the computer would allow me to WRITE in Greek while in the MIT web-mail but would not read Greek language e-mails. I had to translate them.
		1167784	4.17	E-mail notifications were perhaps too concise. I went into the help desk and one of my messages was not relayed by a staff member to the persons working on my computer. This was rectified almost 24 hours when I had to respond to a follow-up question.
		1166616	5.00	Great job!

3/1/2010	Help Desk::Service Center	1162210	4.17	Received great info about what next steps I could take to fix my drive since you couldn't fix it.
		1140476	5.00	This was actually two problems - the problem of converting my home Outlook to Exchange revealed the fact that my IE8 could not accept certificates. So one visit to IS&T was required to track down the fact that a registry had been corrupted. Then a second visit was required to sort out the problems I had created in Outlook when trying to make the switch. IS&T staff was extremely helpful and patient throughout and they ultimately solved both problems for which I am grateful.
	Help Desk::Business Help	1172208	5.00	After much trouble with trying to contact the ecat3 support staff over the last couple months, it took only one day after contacting IS&T to have the situation resolved!
2/22/2010	TNIS::Trouble Calls	1155993		The response was quicker than I expected. Please extend my sincere thanks to the IS&T team. They have always been
	Help Desk::Call Center	1166528		responsive to my needs. NO additional comments. My ticket was handled perfectly and resolved in a timely manner. Thank you as always, Amina Hamzaoui
		1166458	1.67	I was told that you aren't certified to work on Toshiba laptops, and that the best help he could offer me was to either mail away to Microsoft for a CD or take my laptop to Microcenter and ask their Geek squad. I think this was abominable seeing as it was not an issue with the laptop itself, but more that Windows had crashed. IS&T was reluctant to provide me any service, and I think that this is ridiculous considering the caliber of technology at this university. Furthermore, I believe that this probably happens to many students across campus because not everyone owns a Dell or the few select laptops which you are actually certified to fix.
		1165908	5.00	Jacob was extremely helpful in researching the issue and finding the solution, quite professional and polite in the process.
		1165749	5.00	Telephone help was very good. My problem was not solvable, but I more or less expected that it would be a problem in the HP software, and nothing you could do about it. So I hoped for a happy resolution, but didn't expect it. Your guy was really great. THanks.
		1164224	1.67	I emailed your staff for assitance in finding a higher end PC for my professor as I don't have much time to do that. I was directed to the main shopping page with the one PC and one Apple to choose from. If we are expected to research such requests ourselves and purchase it outside of our MIT internal purchasing then I just needed to know that.
		1163095	4.17	I thought the staff did a good job. Unfortunately, the problem I had with my computer was not something they could fix because Apple does not support products over 5 years old.
		1162145		with regards to my ticket, i would like to say that the staff gave me more credit than I deserve in their confidence in me following the procedure to authenticate windows 7. The section that was relevant to my problem was not very prominent on the page so I inadvertently looked over it the first time, it had to be explicitly pointed out. If this was done in the first place the problem would have been resolved much sooner. Thank you.
		1162111	0.83	I have not received any emails about a loaner laptop, so the issue is not resolved.
		1161362	0.83	No one acknowledged my ticket - just closed it.
		1142585	5.00	Fred was extremely helpful, courtéous, and patient. As a graduate student, my availability to answer non-critical emails is limited so I appreciated Fred's persistence in trying to resolve my ticket, and the manner in which he approached it (he wasn't pushy at all).
	Help Desk::Service Center	1161825	4.17	My wireless network stopped working 3 days later.

Staff was extremely helpful. The problem, however, is murky. The question: how risky is it to upgerade to Snow Leopard? The staff gave me advice with respect to Photoshop, for example. Don't upgrade because older models of Photoshop have had problems with Snow Leopard. I checked on the net. Some older models do have problems but others apparently don't. The bottom line: the fit between Snow Leopard and one's own computer array of applications is very idiosyncratic. Therefore, if it's not broken, don't upgrade it. I wish there were a more definite way of dealing with this problem, but your staff couldn't be more helpful. 1158982 5.00 I was surprised at the speed of response, it was excellent. was that there was nothing further I needed to do about roles; I just needed to wait. 	TNIS::Trouble Calls	1142259	4.17	In answers to questions 1 and 5, I've put N/A because I had two very different experiences with the staff that solved this ticket for me, and the answers differ between them. Person one is who I got on the phone in the first place: I didn't feel she wasn't very courteous, and for me that got in the way of her professionalism. Likewise, I had some trouble understanding her explanations despite my computer expertise. Person number two, the one who has assigned to the ticket, and the one who solved it was the opposite: I didn't get a chance to talk to him on the phone, but just by the email exchange, I felt I was dealing with a professional, courteous and patient staff, and he explained everything concisely and in a very understandable manner. Thanks!
	Help Desk::Call Center	1154516	2.50	I Believe that IS&T did the job they could, but if you go to Google, (not MIT-Google), and type "csbi", the first thing that comes up is "CSBi at MIT", which is just where I wanted to go. It does not come up at all on MIT-Google. That is really bad! It is also true for the Broad Institute (even though it is now independent, it still has MIT affiliations and should be there!!!)
		1154028	1.67	If you're going to turn away people with non-standard OEMs but tell them to scrap their computer, you might as well help them salvage what they can.

		1151272 1151111	5.00	I found out the problem caused it after sending email to help desk. This case was not solved by them.
		1151080	5.00	The staff member I spoke to suggested a solution to my request that I did not think of and that much better than what I
		1150695	5.00	was asking for. The quick turnaround was especially nelprul - I was trying to update a wiki and had a problem because a setting in IE8 was not done - VPF had just upgraded to IE8. The issue was resolved in less than 1/2 a day. In reviewing the ticket, I see it would have been resolved quicker if I had sent a screen shot with my first inquiry - then the help staff could have seen exactly what I was seeing. But I was very pleased that they understood the problem and had the knowledge immediately at hand to tell me how to resolve it. Much appreciated. Regards, Linda

2/1/2010 Help Desk::Service Center	1141630	Thank you for the feedback opportunity. My laptop either stopped working (complete freeze) or would not start with the power button. The IST tech thinks it is due to the hard disk. It seems to more connected to the logic board (why would a disk problem cause it to abruptly stop or not start?) but I am not the expert. The tech recommended, reasonably, that I replace the machine, which is four years hold. I cannot argue with the decision, which seems correct, even though I am not happy with the longevity of the machine.

Telecom::3help	1135862	The less that satisfied responses above refer to my one main concern. I'm a staff member at MIT who wrote in with a question regarding a student (who I cc'd (and noted this in the email) to involve him in the correspondence). However, the person who wrote back, while giving a helpful and accurate answer, failed to include the student in the reply. While it wasn't a big time sink for me to forward the response onto the student in question, it seems less than efficient and would have been better to include the student on the reply to a) give him the answer asap and b) minimize the # of emails. I'm not sure if this is because of a limitation in RT or staff procedure, but if you could look into it I think that would be helpful. There are lots of service providers on campus like me who, instead of just referring students to IS&T, like to go the extra mile to contact you on their behalf, so it would be useful to consider the best workflow around this. 1/18/2010 Software::Matlab::Questions	1122072	4.17	I think the person was out of the office (found out by phone), but responded back immediately when scheduled to get back, so I was very thankful! The staff member was extremely professional and answered the question completely to my satisfaction, also pointing me in the right direction for additional information. My recommendation is that if we email people specifically to vIsI-XXX@mit.edu, where XXX is the topic, if they are out of office, then maybe there could be an auto-respond (if that method doesn't already exist). But, just to be clear, I was very happy:)

TNIS::Trouble Calls	1083372	3.33	This ticket actually covers two internet connection outages (the problem recurred after it was fixed). I was pretty dissatisfied with the handling of my ticket on the first occasion - it took over 2 weeks for IST to fix the internet connection on my work computer, and it just broke again a few weeks later. Although I had no trouble contacting an IST rep about the issue, the people I spoke to told me that they didn't have the expertise to fix the problem. (But when my PI called up, they managed to find someone with expertise and fix the problem within 24 hours.) I was quite satisfied with the second handling

	1125397	2.50	Could have offered advice to avoid this occurrence potentially repeating (however, I did not request this advice).
	1125354	5.00	Thank you for this follow-up. Your IST "Help Line"staff member could not have been more helpful and patient. For many years, I have used remote access software (TIMBUKTU) to control my office computer from home. I would like to do the same from my Lap-top when travelling or vacationing. Basically, I need to get onto the Internet with my lap-top, and I would like my lap-top to have independent capability to do so (i.e., be wireless). Your staff member and I discussed the availability of such capability through companies such as AT&T which I had investigated. While monthly charges for such service are quite reasonable, a contract of 12 to 24 months is also required, and I need it only until June 30. If such service can be obtained at a lower cost, either through MIT or otherwise, neither your staff member nor I know of it. If you would care to discuss this further, please contact me at jmdhosi@mit.edu, or x3-3301, or at home, 617-527-5916. (I will not be on campus tomorrow!)
	1125165	4.17	Clearer directions on whether an ECAT issue needs to be solved through IS&T or Procurement.
	1125152	5.00	Great work, thanks!
	1125073	1.67	All that needed to happen was the router needed to be reset. I don't understand why this took 4 days, especially since it can be reset remotely. 4 days without internet is a long time for an office of grad students, especially when programs like MatLab require us to be logged in to the network. On the plus side - the guy who came to fix the problem was very good.

1/12/2010	Help Desk::Call Center	1123474	0.83	began an IAP class with more than 50 people. We could not get a stable internet connection. I have a lot of IT experience and called the help desk; when they didn't have a good suggestion and kept misunderstanding (believing that individual people had pc problems), I suggested to them that they reset the routers. Instead, they took the ticket, did nothing, and no person ever came, though I was promised an in-person visit. I called multiple times that day and was ultimately told that I should not expect the routers to be able to support the students. On Wednesday, filled with frustration, I called again and was very aggressive in my requests. I believe that request got a second ticket number and within a few minutes, I got an email that the routers were resetting. This solved the problem. I am extremely disappointed that clearly explaining that an entire class could not get consistent web access was not! a red flag to a help desk person; nor was explaining that the class was on web technology or that it was a one week class.
				Thank you for asking about my experience.
		1123383	5.00	Thank you. The solution worked out great!
		1122407	5.00	I have in general been very satisfied in dealing with your office.
		1121960	5.00	Alas, you can't protect me from myself! Plunge ahead, ignore the warnings, splat.

			5.00	I was surprised and happy to get regular updates on the status of my problem. That was incredibly helpful! The only less than excellent thing was how long it took to fix my problem. Hence the "satisfied" mark above rather than "very satisfied". However, since IS&T needed to talk with the registrar about this, I realize that it was not entirely under anyone's control. It was still fixed in a timely manner, just not lightning fast.

	·			The slow wireless problem was fixed by installing a router inside the common area in my room. The staff were extremely professional, and when I had told them about the problem, gave me a clear outline about the reason for the slow wireless, as well as how long it would take to fix it during a general meeting in Tang. My wireless connection is now indescribably better, and has alleviated a huge inconvenience. I am very impressed with how professionally my problem was addressed, so thank you!
	Help Desk::Call Center	1119488	5.00	Great service!
		1117940 1117851 1117518	5.00	The performance of the staff is outstanding when I communicate a problem, but the performance of IS&T is unsatisfactory when it needs to be proactive. When the Spam system was changed there was no notification on how to deal with it. We lost the ability to operate through webmail and were not informed about the new website for spam management. The new system was spamming mail from MIT faculty and students! Couldn't this have been debugged before implementation? Improving? Are you kidding? You did GREAT! In general, I found the service at IST very professional and excellent. In this case, the problem was not resolved as we didn't know why the proposed solution did not work. I fnally and subsequently walked into your office with my labtop on
				Mass Ave and got it fixed right there on the spot. So, now, the problem has been resolved, via an on-site visit to your office.

				I got to use the new online network, where the staff member
				could access my computer to help me remedy the issue. I
				highly recommend it and was very satisfied with my experience
		1117462		As always, the IS&T support is fast, accurate, and complete!
		1117419	2 22	You are doing a fantastic job! I didn't get much help from IS&T - I called over the phone and
		1117419	3.33	was told that the problem did not sound familiar. The only
				advice I was given was to download the free MIT virus software.
				but to do that I needed to delete my current software which is
				better rated. I proceeded to work on the problem myself, and it
				is not yet solved.
		1117262	4.17	
		1116781	0.83	I had a webex problem. I do not want to talk to the general
				webex people - I do that too much already. I wanted to talk with
				someone knowledgeable about it AT MIT, because I didn't
				receive the normal email that should tell me about my recording
				of my meeting, and I wanted to know whether MIT had set
				something different as a default. (I've been using someone
				else's webex service and NEVER had this problem.) All I got
				from MIT was a pointer to the webex people - completely
				uninformative and not helpful. I wanted facts, not another
				forward pointer.
		1116722	5.00	I've found that if it is something the Help Desk staff can
				answer, the service is quite satisfactory. If they have to hand it
				off to someone else, eg networking, it is like it goes in a black hole. one 2009 item took 5-6 months to resolve. HD did do a
				nice job with periodic checkins, but when it was finally
				resolved, the case wasn't updated with any explanation - what
				had suddenly stopped working just as suddenly and
				inexplicably restarted working.
		1116388	4.17	
				re #4 - The difficulty had to do with the number of addressees
				exceeding the capacity of the IMAP mail system. There were
				over 90 addressees. The suggestion was that I break up the

				just envious that *some* folks can manage sending to abot 100
		4440440		adddressees, but we can't. Melissa Fox for Ron Prinn
		1116119		A somewhat unusual circumstance regarding this ticket was
				that I immediately received the automatic response and ticket
				number; then waited a few days for an Emailed resolution that
				did not arrive. I then went to the web-interface, entered the
				ticket number, and found out that it had been answered. I am
			4.17	puzzled as to why the answer did not arrive to me via Email.
		1115984	5.00	Thank you so much for your help!!
		1115961		
				He was great! He was extremely thoughtful, committed, and
		4445047	5.00	resourceful in helping with a complex issue. Much gratitude! The process of taking ownership of files in Windows / (in this
		1115247	2.50	case files that were created under XP) is complex sometimes
				works, sometimes doesn't. Sometimes when it works the
				permissions gained are lost on the next bootup. I am
				sympathetic with you guys, to whom Windows 7 is srill new.
				But there must be some straighforwad way to solve thie type of
				problem and get the administrator access to these files once
				and for all.

1/4/2010 Help Desk::Call Center	1114359	The IS&T department actually did not resolve my ticket problem. I use a Mac and when I have problems the team oft cannot help me on the spot and need to call me back. When called this time the woman asked me to make sure my resolution was at the highest, which it was. The zoom had be turned on (I didn't know Macs had a zoom function). But oth than fixing the resolution she had no idea how to fix my problem. She took my information and said someone would back to me. In the mean time I did a google search and founthe solution myself. I called IS&T back to make sure they did spend time trying to fix my solved problem when they could
		using helping someone else out. Overall I am dissatisfied by their general lack of knowledge on Macs. I realize they predominately use and fix PCs, but if you work at the Help D you need to know other machines than PCs. Many faculity, staff, and student use Macs today and the IS&T staff really needs to be as proficient on the! Macs as PCs. I am thankful to the staff real to the staff rea
	1109288	2.50 the Help Desk exists, but they need to take a course on Mac. 4.17 you guys did a great job, it just took a while. I assume that had something to do with the fact that this occurred over christmas break. Anyway, nice work.
Help Desk::Service Center	1117488	5.00 The PC Repair service in Bldg. N41 is a great resource. The
	1115312	you. Ine information (PC Service Repair backups) were forward to me the next day. Thanks for the fast turn-around. I was asked, "In the future you can contact me directly rather than open an RT case. I can be reached at: jronald@mit.edu or at 253-0815." That's fine, it's just that sometimes this is how emails get missed. At least by sending the request to RT, it' the system, and I can check to see if there's been any action noted in the case. All-in-all, I have what I need, and that's a
	1084282	5.00 positive. 3.33 The issues with my computer were resolved quickly, but th email to tell me that I could pick up my computer came seve weeks later because someone hadn't hit send on the email t they had drafted. I tried to ask about the status of my comp several times over email, but got no response. Aside from t all of the actual work with the computer was satisfactory.
Help Desk::Business Help	1120306	I got a fast, reasonable suggestion for my problem, along van invitation to write back if it didn't workwhich the help dresponder new might be the case. It didn't work, so I'll be bail if another possible solution does
	1118592 1118297	5.00 As always, your staff was a more than helpful. The only reason I gave a 5 on #2 is because they could not solve the problem immediately as were not sure how to fix it However, I received emails quickly with several possible solutions and ultimately everything was fixed. Great job!
Telecom::3help	1111041	4.17 Thank you for fixing the trouble. However, I was not notified the completion of the request, so i had to wait and find out the it was fixed. But overall, I applicate your help very much!
Mobile Devices	1118790	5.00 Only problem was that I dropped in during walk-in hours (4 PM) but no one was around to help. However they were able help me first thing the next morning. Being able to have my problem fixed on the spot would have taken satisfaction from 95% to 100%.
	1107518	4.17 Let me know when the service has been undertaken and completed. I stopped getting emails for a day and had no id why. This might be due to my use of Pine. Send a follow up with links to appropriate resources to deal with change. I suspected I was being migrated to the exchange server but to go to some lengths to figure out how to access my mail online and through my mobile device.
