

Interpreting the Report

The scores and charts on the first two pages show cumulative averages over 12 weeks of client responses to our per-ticket survey questions. Each ticket belongs to a specific queue, and scores are reported at the queue level on page 3. The IS&T level rolls up all the surveys; Service Desk rolls up many CSS queues; Call Center is a subset of that and excludes the Repair Center, which is shown on its own. For all the charts, the 12-week window rolls forward each week, and the scores are always across that window.

The multiline charts try to convey the rhythm of service performance over time and the relative levels of satisfaction by service dimension. A high-performing service would have all its lines flowing consistently at or above 4.5 and not too far apart from each other.

Some queues have survey responses too intermittent to graph with weekly readings; those are show using only summary numbers for each dimension. The numbers are 12-week averages.

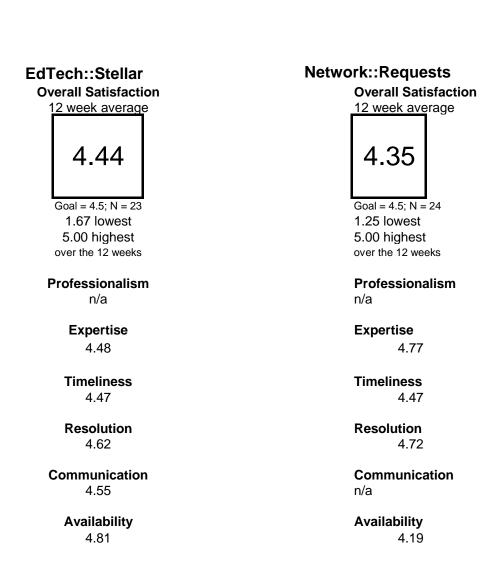

Detailed results by month by queue are shown on the third page showing up to 3 months and resetting at the beginning of the quarter. Color-

These Queues have low enough response rates per week that a weekly graph would be misleading.

All scores presented are a Quarterly average, to smooth out sparse data. Monthly detail appears in the table on the next page.

Note: the big box score of "Overall Satisfaction" refers to question 7 on the survey, not an aggregate of the other scores listed below.

					You guys do a fine job. You answer the phone when you are able to. When you are not able to; I know it's because you are
					too busy. I've been at MIT for 31 years; the level of
					professionalism and the ability of IST to respond to problems
					has greatly improved over time. You get better & better; even when you are short-staffed. Keep up the good work. I'm a big
					fan. I challenge any other university to support its clients as
	8/3/2010	Help Desk::Business Help	1293546	5.00	well as IST supports MIT. Can't be done. We are the best.
					I am very discouraged to find the documentation for this process is split between web pages and Hermes pages. There

					Great experience and very helpful. I often find that when I call

			1303000	3.00	The person who helped me was terrific. I was able, with his

		Help Desk::Service Center	1304857		Just very, very well done.
					I was only slightly satisfied with the resolution because the
					initial issue, which was my computer crashing followed by the fan running, occurred the day my computer was returned.
			1299782	4.17	However, I have not had an issue since.
					My overall dealings with Stellar this week have been horrible.
					There has been complete confusion about a simple request to
					provide websites for multiple sections of a class (21W.730)
					taught by different instructors. In addition, when I applied for a website for my other course, SP.401, Intro to Women's and
					Gender Studies, I was told that the course wasn't listed in the
					registrar's schedule. When I found the listing in about 5
					seconds and sent it to Stellar, I was told that the problem was
					that the course was listed as SP-401, when it should have been SP.401. That may or may not be true, but wouldn't it make
					sense to check under SP.401? The impression is that these
					transactions are being handled completely by machine and not
		Help Desk::Stellar	1304236	0.83	by an individual. Very, very poor service.

				The ticket (requesting information) was logged on July 29th and I was contacted about the ticket about a week later. During
				that time, I was able to address my issue dealing directly with
				external (SAP) technical resources (I probably should have
				closed the ticket at that point). The support I receive from the
				Network team is usually very good an understanding as to the

				I tried the preliminary suggestions made by the Help Desk and
				when those didn't work, I eventually found the answer I needed

				Not having uploaded (large) files for ftp for several, having gotten lazy/used to just using web browsers for ftp downloads and email for sending, I needed a quick refresher on using Fetch for uploading. A quick lesson during a brief walkin was all I needed both the official help desk person and other staff present were friendly, professional, and efficient. One suggestion, though an FAQ that browsers generally can be
				used for downloading larger files these days, but that Fetch (or
				the Windows etc equivalent) is still needed for uploading,
7/26/2040	Halp Dacky Sarving Contar	1299778	5 00	would have saved the trip in the first place. I know I looked
1126/2010	Help Desk::Service Center	1299776	5.00	and looked before I made the trip/help request! I am satisfied in the way that the staff have been very

		1291754	5.00	They did a fine job.
				They did change the hard drive (this was the actual hard
				problem) but the hard drive comes without a boot partition so I was not able to even turn the computer on. I guess this is a Dell
				problem but from my point of view the ticket was not resolved

				i requested a puck up of my computer. however, the person who was supposed to deliver the computer got the message
				only 7 days later. Apparently typing down the pickup order

				This particular problem, needing to reboot the RedHat linux

				network at Edgerton (my understanding from other residents is that the wireless has had issues in the recent past as well,
				although they may have been resolved). The problem was
				"solved" quickly, but who knows how long it will last. I connect
				to my computer remotely from work (i.e. on MIT campus)
				frequently and these disruptions dramatically affect my ability
				to do this. The network needs to be legitimately fixed, not just temporarily patched up. I appreciate the hard work that the
				support staff put in, and I recognize that the state of the
				network is not their fault but it seems unfair that housing that
				costs the same as S&P/Ashdown has a network that is at least a
				decade behind in technology and is far worse off in terms of
				reliability. Again, I want to emphasize that I don't believe that
				any of this is the fault of the network staff (except, perhaps, their constant belief that the network is permanently fi! xed
				when it obviously isn't). Perhaps this is a higher level funding
				issue. My time at MIT is slowly coming to an end so I personally

•		12009/3	1.07	computing-help, I was able to pinpoint the source of the
				problem. Unfortunately, computing-help was not able to
				identify the actual cause and therefore could not suggest a
				solution or more importantly a means to determine if the
				problem happens again. The problem is rather esoteric so I am
				not sure that it would be reasonable to expect computing-help
				to resolve it. Computing-help did a good job in helping with my individual problem, but I would have liked to see someone
				address it at a higher level. As things stand now, any use of
				ESS on tables with compound keys is suspect. That includes
				accessing most of the data warehouse tables. I would think
				that the IS&T folks who are recommending FileMaker,
				especially as a tool to access the Data Warehouse, would want
				to confirm that something in my table definitions or the way I set up the ESS caused the problem, and probably identify what
				was wrong so they could instruct o! thers not to make the

					request to have someone check on the service. Then the response did not indicate whether anything might have been done in those 24 hours to fix the problem simply that at that point it looked like it was working. The problem I had reported had in fact gone away, but the update service was still not working at the time that I got the response. Instead, any attempt to run up2date produced the dreaded message to the effect that the metafile had a bad checksum. I tried using "yum clean" followed by "yum update" to make sure that the problem was not something at our end. That didn't fix it. This condition had happened in my experience numerous times in the past and it was always corrected when the MIT satellite was put back into synchronization with the RedHat servers. It was because of this ongoing problem that we had switched most of our servers over from the MIT satellite service to using the paid-for commercial serv! ice directly from RedHat.
