

*Lesson: Aggregation of media connected to at least one rig client, for the purpose of facilitating specified learning outcomes.*

*Lesson Meta-Data:*  
Author  
Target audience

Notes:  
Q: Does the meta-data need to indicate access mechanism (queue vs booking vs ...)?  
Q: Do we distinguish between technical “system” meta-data and “catalogue” meta-data?  
Q: Where do we capture the semantics of the associations?  
Q: Should the semantics be part of the meta-data? Or part of the configuration? Or neither? Or both?

*Learning Media: Reusable content intended to support learning.*

*Rig Media: A specific form of learning media that is associated with one or more physical or simulated rig (types).*

*Media Meta-Data:*  
Author  
Target audience

*Rig: Provided platform on which experiments can be carried out.*

*Rig Meta-Data:*  
Author  
Target audience
