

Login Screen

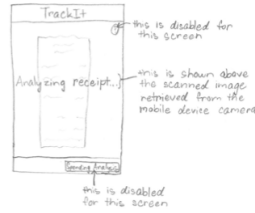

\*Note that there is no user registration button. System administrators for the TrackIt software will create users on a separate interface, in which a user will provide authentication credentials.

\*This screen is only shown if the user has not logged in yet or if the user's session has timed out since last access. This reauthentication provides additional security.

Preview Screen

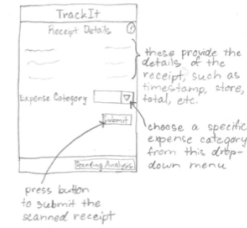

Analyzing Screen

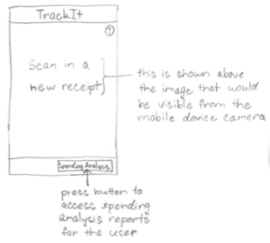

\*The overlay text will remain on the screen until the analyzing process finishes.

Details Screen

\*If the Spending Analysis button is pressed on this screen, the receipt will not be submitted and will need to be scanned and analyzed again.

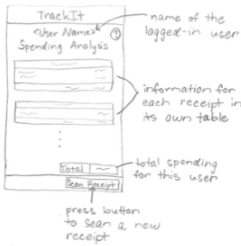

Scan Screen

\*If the user still has an active session or is still logged on, this is the first screen that the user sees.

\*The overlay text will disappear after 3 seconds.

Spending Screen (Traveler)

\*Although information is organized by receipt here, it can also be organized by expense category, timeframe, store, etc.

\*Graphical representations can also be allowed here, but are not considered at the moment.

Selection Screen

Spending Screen (Admin)

\*This screen is similar to the one for travelers. The same details for that screen apply to this one.

\*This screen is the initial screen shown for business administrators after they are successfully or currently logged in.
