

Home screen:

The home screen is layed out like a file cabinet. Select tabs to play or edit. Play/edit buttons do not become selectable or enhanced until a tab is highlighted. The 'more' tab brings a user to more tabs and is only visible if there are more tabs than fit the screen. Selection of 'New' only allows edit to become selectable. Most recently used decks are stored furthest forward.

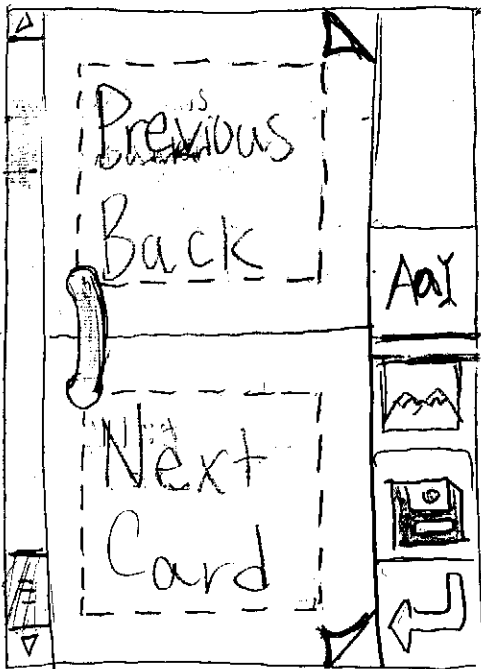

Anything Edit Mode:

Add cards/Edit/Trash/Copy cards to another deck buttons are available. When cards are selected (checked) and Trash/Copy are selected, those cards are deleted/copy. When deck name is selected (and Trash) the deck is deleted. Name can be changed through double tap. Default Name is untitled. Edit is similar to add, except only the selected cards are displayed on Add/edit screen.

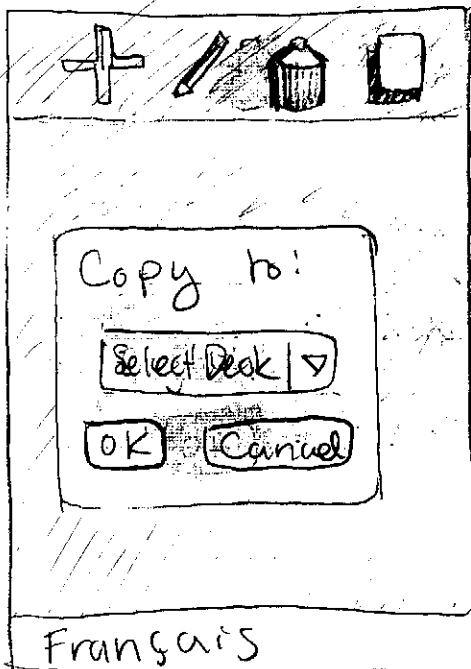

Deck name; Tap to edit/highlight

New+Edit/Add:

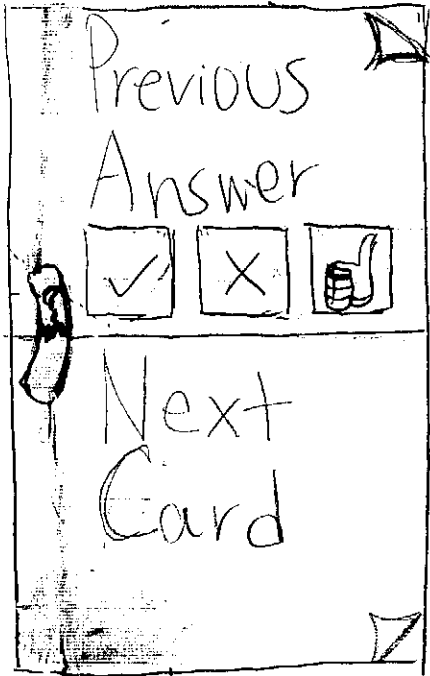

Cards are added/edited in a similar format to "playing" the deck. Tap folded corners or swipe up/down to navigate. Editable areas on cards will be enhanced & surrounded by dotted lines and have Previous Back / Next Card written in light color to imply editable. Text/Image/Save / Return are menu items. Scrollbar is defaulted at bottom for last card & is proportionate to some degree. New cards automatically created when next card is empty. All empty cards are removed at save.

New+Edit/Copy cards:

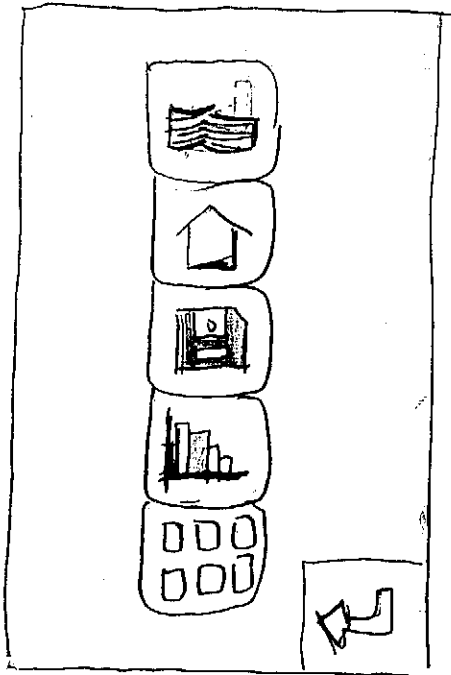

Background is greyed over. Dropdown contains current decks.

Play:

Play mode is a metaphor for flashcards on a key ring. Flipping folded corners/snip allows navigation. At the answer side, a card can be marked right/wrong/known? on the keyring implies menu when select
