

HW2 – Heuristic Evaluation
MoneyManager

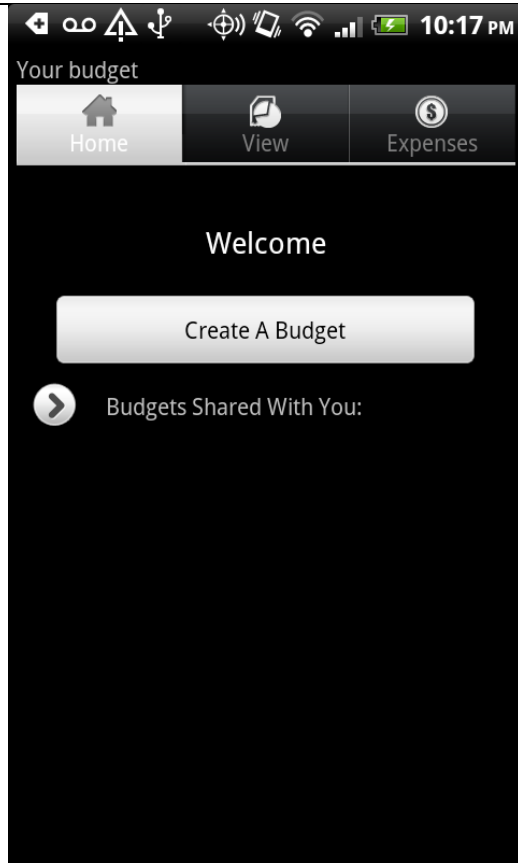

- **Heuristic:** Learnability
- **Severity:** Minor
- **Description:** I could not type in my password easily. I wanted to scroll the background screen upward so I could then click on the password text field but that was impossible. It took me a while to realize that pressing enter would take me to the next text field. (Also, on other Android devices, the “keyboard down” button isn’t there, and the only way to click on login is to press the back button.)

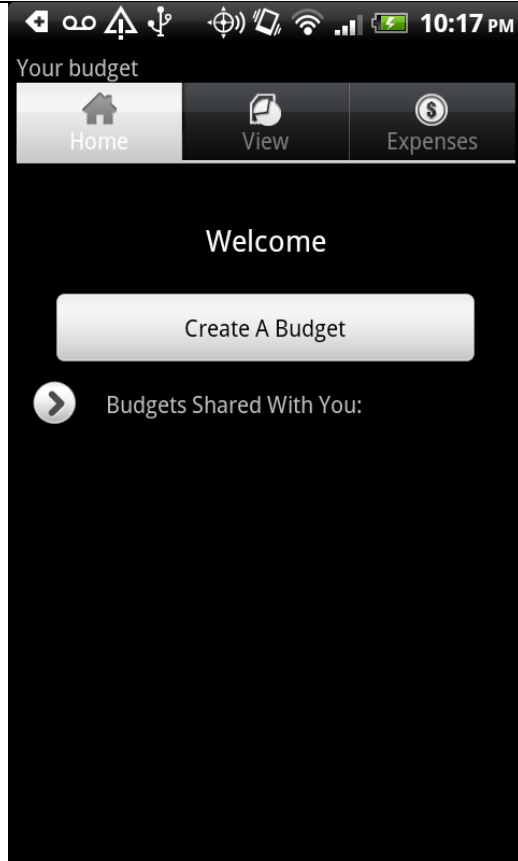

- Heuristic: Affordance
- Severity: Major
- Description: The “Register!” needs the affordance of being a link (or button). It is not clearly clickable.

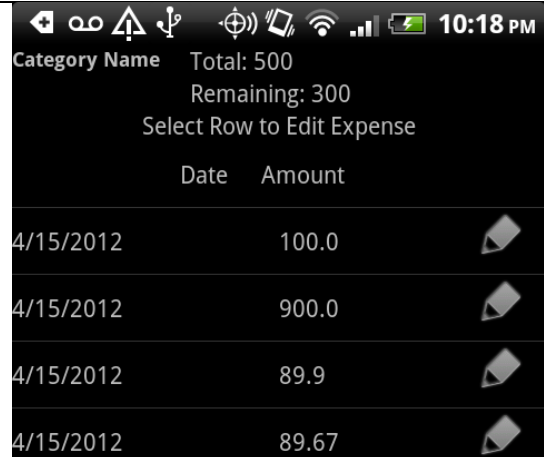

- Heuristic: visuals/navigation
- Severity: good
- Description: The icons are nice for quickly seeing what tab I'm navigating to. They are simple and not overwhelming.

- Heuristic: visual affordance
- Severity: cosmetic
- Description: The “view” icon confused me a bit. I could not quite figure out what the image is of.

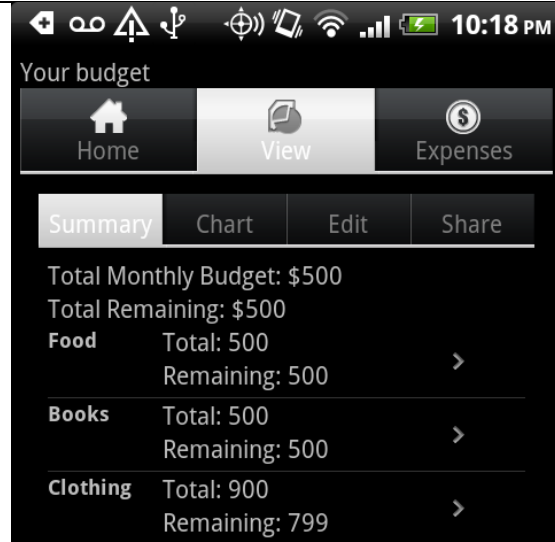

- Heuristic: Alignment/Readability
- Severity: Major
- Description: The "Date" heading is not aligned with the dates.

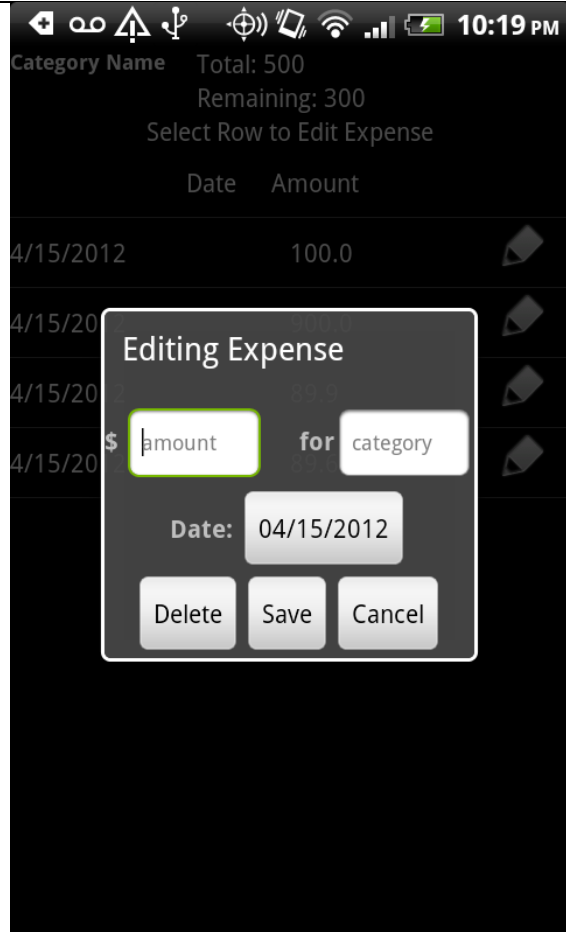

The screenshot shows a mobile application interface with a dark background. At the top, there is a status bar with various icons and the time 10:18 PM. Below the status bar, the text "Category Name" is followed by "Total: 500" and "Remaining: 300". Below this, the text "Select Row to Edit Expense" is displayed. A table with two columns, "Date" and "Amount", is shown. The table contains four rows of data, each with a date "4/15/2012" and an amount. To the right of each row is a small icon of a pencil, indicating that the row can be edited.

Date	Amount
4/15/2012	100.0
4/15/2012	900.0
4/15/2012	89.9
4/15/2012	89.67

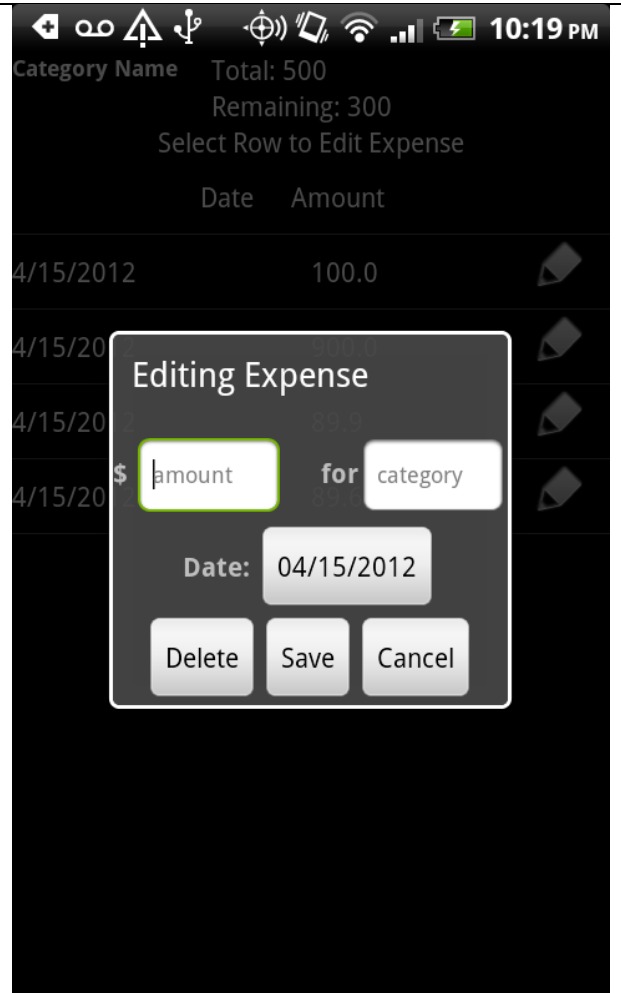

- Heuristic: color/layout
- Severity: minor
- Description: The main information on this page is crowded. Total budget and total remaining should stand out somehow. Perhaps with a different color or different layout.

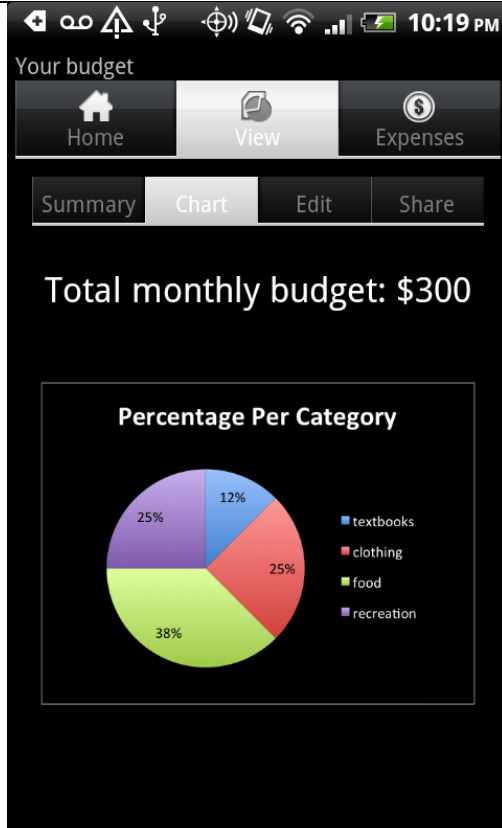

- Heuristic: efficiency
- Severity: cosmetic
- Description: when “amount” is pressed, the number pad should show up instead of the keyboard.

- Heuristic: learnability
- Severity: major
- Description: Why can I edit the category? I thought I went into a specific category and that I am editing a specific part of that category. Not sure what changing the category would do.

- Heuristic: Internal Consistency
- Severity: Major
- Description: Sometimes you have \$, sometimes you don't.

Your budget

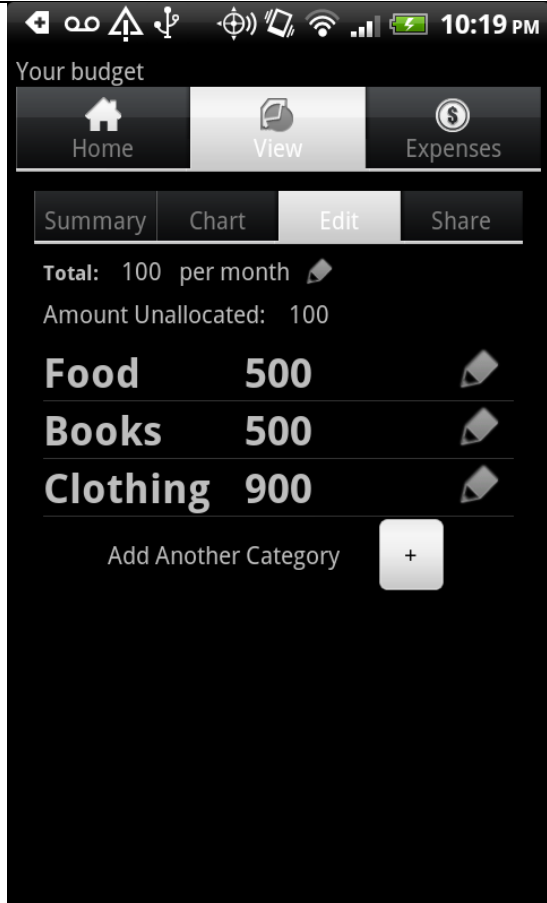

Total: 100 per month

Amount Unallocated: 100

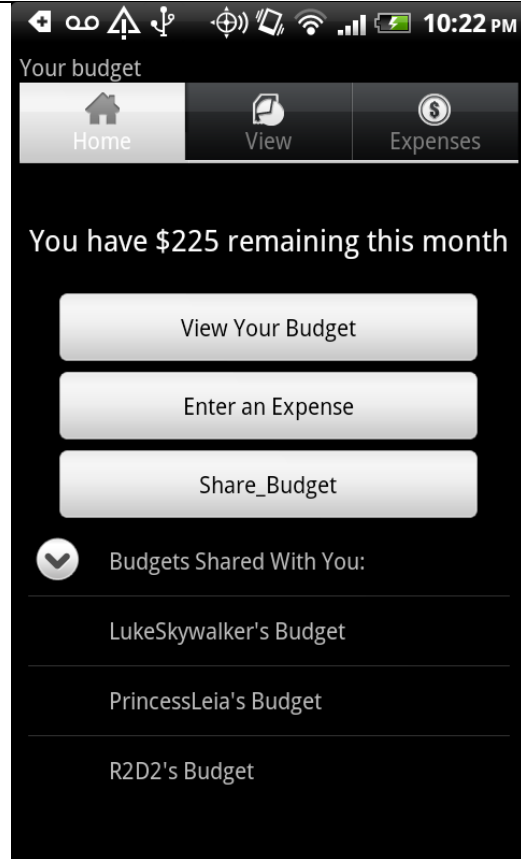

Food	500	
Books	500	
Clothing	900	

Add Another Category

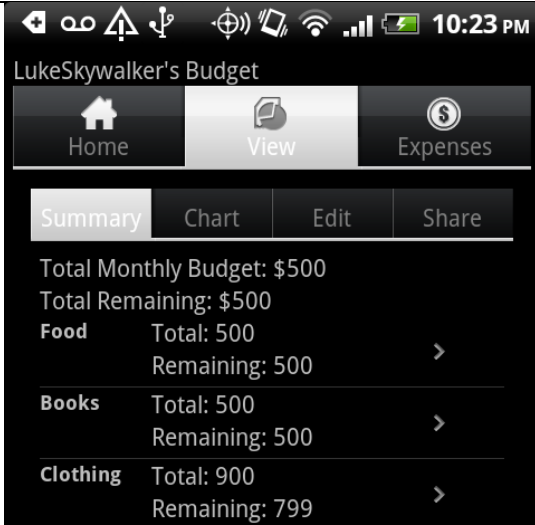

- Heuristic: Alignment/spacing
- Severity: good
- Description: Good spacing/alignment with the amounts next to the categories.

- Heuristic: Internal Consistency
- Severity: major
- Description: I'm confused why "Home" changed so much since my first viewing of it. What did I do to make it change?

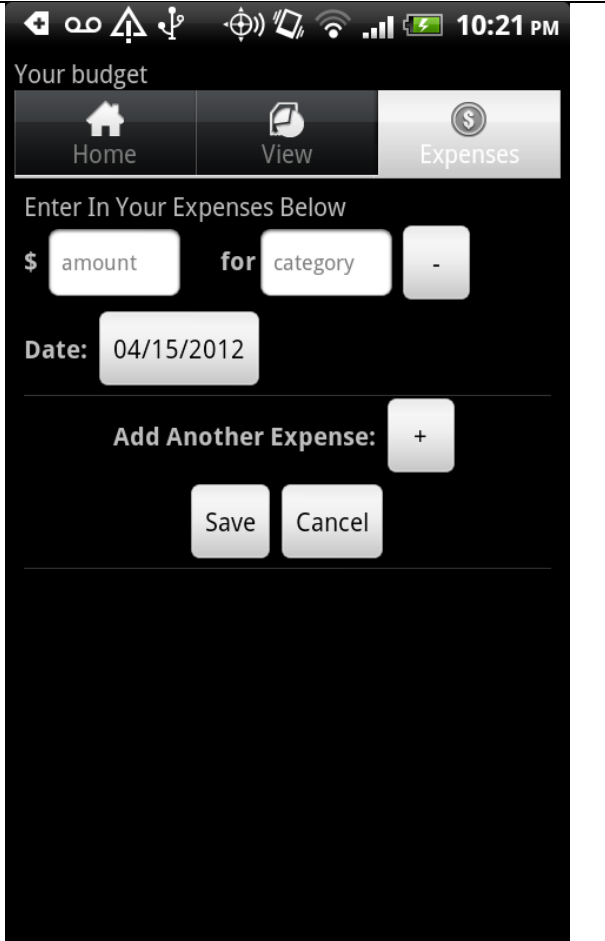

- Heuristic: Visibility
- Severity: Minor
- Description: I did not notice the header ("LukeSkywalker's Budget") for a long time. It should stand out more.

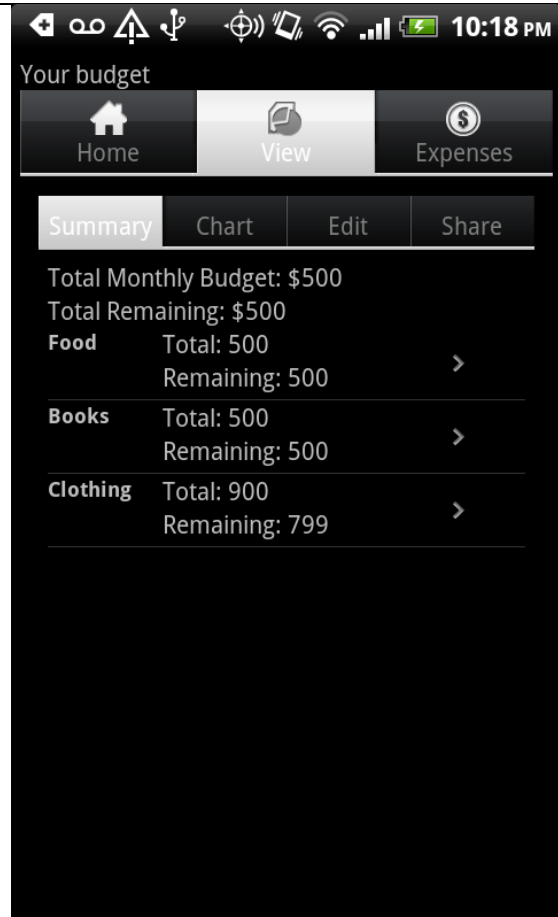

- Heuristic: Simplicity/Minimalist
- Severity: Minor
- Description: The circled text on the register screen seems unnecessary. The default text in the text fields gives plenty of information.

The screenshot shows the registration screen for an application named "MoneyManager". The screen has a black background with white text. At the top, there is a status bar with various icons and the time "10:16 PM". Below the status bar, the text "MoneyManager" is displayed. The main heading is "Welcome to MoneyManager". There are three input fields, each with a label above it circled in red: "Enter desired username:", "Enter email address:", and "Enter desired password:". The first field contains the text "Username", the second contains "email@example.com", and the third contains "Password". Below the input fields is a "Register" button. At the bottom of the screen, there is a link that says "Already have an account? Login!".

- Heuristic: Learnability
- Severity: Minor
- Description: What does the “-“ button do? Pressing it does nothing.

- Heuristic: navigation
- Severity: good
- Description: The tabs are really nice for navigation. The fact that the second layer of tabs are much smaller is also a really nice affordance for why they are “sub-tabs”. The highlighting is also very clear.

- Heuristic: feedback
- Severity: good
- Description: It's really nice to see the tab turn green when I press it. It's good feedback for letting me know that I actually got it. Especially on a mobile device where mis-pressing is common.
