Heading

- Autocomplete Examples
- Enabling and Disabling Autocomplete

When entering content into a Wiki page, typing a trigger character will display a menu that will allow you to auto-complete certain macros. Continuing to type after the trigger character will cause the autocomplete menu to close.

Autocomplete Examples

<table>
<thead>
<tr>
<th>Task</th>
<th>Trigger Character</th>
<th>Keyboard Shortcut</th>
<th>Description</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Add a link on your page</th>
<th>Ctrl+Shift+K</th>
<th>See a list of suggested pages or other locations to link to from your page.</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Link suggestions" /></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Display an image, video, audio file or document on your page</th>
<th>Ctrl+Shift+M</th>
<th>See a list of suggested images, multimedia files and documents to embed in your page.</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Media suggestions" /></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Add a macro on your page</th>
<th>None</th>
<th>See a list of suggestions as you begin typing a macro name.</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Macro suggestions" /></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Notify another user by email that you have mentioned them on your page</th>
<th>None</th>
<th>See a list of suggested users to mention.</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="User suggestions" /></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Enabling and Disabling Autocomplete

You can turn off the triggering of autocomplete by the `¶` and `!` characters. This will prevent the autocomplete from starting automatically when you press one of the trigger characters. You can also turn it back on again.

**Notes:**

- This setting does not affect the keyboard shortcuts for autocomplete (Ctrl+Shift+K and Ctrl+Shift+M). Even if the trigger characters are disabled, you can still use the keyboard shortcuts for autocomplete.
- This setting affects only you. Other people using Confluence can enable or disable the setting on their user profiles independently.
- Note that autocomplete is enabled by default.
To enable or disable the autocomplete trigger characters:

1. Choose **your profile picture** at top right of the screen, then choose **Settings**.
2. Choose **Editor** under “Your Settings” in the left-hand panel.
3. Choose **Edit**.
4. Either:
   - Disable autocompletion by selecting **Disable Autocomplete**.
   - Enable autocompletion by clearing **Disable Autocomplete**.
5. Choose **Submit**.
